

Ivan Aleksić

[Portfolio](#) [LinkedIn](#) [Email](#) [Sonas](#) [UX Copilot](#)

AI Product Designer with 14 years building and scaling SaaS products. At [Zendesk](#), I designed scheduling tools for enterprise teams managing up to 1,000 agents, with a focus on AI-assisted decision-making. Also, I build and ship my own AI products: [Sonas](#) (AI personas for UX research) and [UX Copilot](#) (AI Figma plugin). Earlier, as founding designer at [Instapage](#), I took the product from 0 to tens of thousands of customers.

Selected impact

- Founding designer at Instapage: 0 → tens of thousands of customers and \$0 → \$16M ARR.
- 4× AI-feature adoption from redesigning GPT-powered workflows.
- Scheduling tools I designed at Zendesk, used across ~700 enterprise accounts (up to 1,000 agents each).
- ~2k installs on UX Copilot, one of the AI products I build and ship.

Experience

[Zendesk](#)

Senior Product Designer • July 2024 – April 2026

- Led the design response to WFM's adoption and retention problems after analysis traced ~80% of the top blockers to the scheduling area I owned. Defined a long-term scheduling-configuration vision (AI included) and a short-term roadmap building toward it.
- Designed AI-assisted scheduling concepts, including an internal tool that helps support managers validate schedules quickly, and explored how AI decision-support could work across scheduling more broadly.
- Shipped the first steps of that vision: agent personal-availability settings, Holidays & Closures, and bulk task actions, each closing a specific adoption gap.
- Led a cross-team initiative to overhaul time-off tracking accuracy across Zendesk WFM, used by support and WFM managers (~700 enterprise accounts, up to 1,000 agents each).

[Instapage](#)

Principal Product Designer • January 2020 – July 2024

- Redesigned AI-powered content generation (GPT-4), lifting feature adoption 4×.
- Owned the redesign of the core product dashboard used by 20k+ customers, improving feature discovery.
- Led the redesign of Heatmaps analytics, improving usability and adoption for marketing teams.
- Partnered with leadership on pricing and packaging strategy during a key growth phase.
- Mentored designers and helped grow the product design function.

Product Manager • May 2018 – December 2019

- Owned roadmap for Integrations, Leads, and Experimentation used by thousands of customers.
- Launched Zapier integration (1000+ tools), significantly expanding the product ecosystem.
- Led redesign and launch of experimentation platform enabling scalable A/B testing workflows.

Founding Product Designer → Senior Product Designer • September 2011 – April 2018

- First design hire at Instapage. Owned product strategy, UX, and core architecture from 0→1.
- Designed and launched the original landing-page builder, adopted by thousands of businesses.
- Contributed to growth from \$0 to \$16M ARR through rapid product and customer expansion.
- Helped scale the product team from 1 to 10+ across design and product.

AI products I build & ship

[Sonas](#) • AI personas that think and react like real users, for running interviews and usability tests.

[UX Copilot](#) • AI assistant for UX work inside Figma: copy generation, AI personas, and design feedback.

[AI Design Review](#) • Figma plugin for fast and practical design critique without leaving the canvas.

Recent education

Reforge • [Retention + Engagement \(2018\)](#)
